

Furtwangen 2013/14 Winter semester

My name is Zsolt Krasznai , I'm a student from University of Óbuda Kando Kalman Faculty of Electrical Engineering and I studied the 13/14 Winter semester in Hochschule Furtwangen University in Furtwangen .

I suppose this town is the best place for study furthermore the HFU lies in the most beautiful location in Baden – Württemberg. When I arrived here I realized suddenly this place is different about my hometown this is the black forest here is possible everytime to go hiking but maybe in winter it's a little bit harder because there are 2 m high snow. I got a lot of chance to discover this landscape for example : Freiburg , Konstanz, Heidelberg, Donauquelle ,Triberg etc. And this excursions would not have been possible without the International Center where the all colleague organize a lot and help us every time.

This university can offer for the students many possibilities for study. The labs are very modern and the professors teach very good things about knowledges and sciences and help for the students unlimited time. I was a student in the CEE faculty (Faculty of Computer & Electrical Engineering) . I took up there 26 ETCS and it included four subjects and two projects. I had there two DaF (Deutsch als Fremdsprache) in B1 and B2 level and I had two English courses what they were Technology and Business English in B2 level. Beside this my two projects were very interesting . I had a project about Robotics in team and we had to be programming one industrial robot with a complex tasks furthermore we studied about robotic theories also . The other project was about lighting technology because I wrote there my thesis and my supervisor gave me a project about this topic to develop my knowledges . My topic was a indoor lighting planning . I had to choose one room in a optional building and I had to plan a complex indoor lighting with use the new DIN EN 12464-1 standard. I had used the DiaLux platform to made this project and this program included a lot of catalogs about brands therefore it was very useful .

If you would like to take up subjects in other faculty it is possible because the professors are very flexible and they help to find a solution always. As long as you want to improve your language skill definitely it is the best place because you can study there parallel the English and Germany also. It was the reason why I chose that town . In our profession this two languages necessary to know.

The University organize International festival every year where all countries can show the national foods and drinks and it is a good event to get more international experiences. We got a 3th position in the competition furthermore that day was the 30th Anniversary between the University Óbuda and the Hochschule Furtwangen University . Moreover I had to make presentation and a announcement for this Anniversary .

The library is very developed in the college you can find there more thousand books and industrial newspapers . Unless you find some books what you need , you can find certainly in the online database such as the DIN or ISO standards.

My accommodation was in the ASK dormitory where you can meet with International or Germany students everyday and you are able to practice a language and make friendship .
