
Erasmus in Porto

Porto the city „who” is loved by everyone. A few days were enough in the downtown and all of my doubts flew away whether I want to spend my next months here or not. I am Daniel Molnar, a student of the Budapest Tech. Faculty of Kandó Kálmán Electrical Engineering and as it has been turned out I applied for studying in Porto with the help of Erasmus Scholarship. I spent five months in the old city and while visiting the most beautiful areas of Portugal, I was getting closer not just to the cognition of the everyday life, but also to the acquisition of a very different mentality.

During this time I learnt languages, took part in accomplishing of a real project and took exams from some subjects. Of course I accomplished the requirements successfully although I have never heard about anyone who has failed up to now. The many programmes and the sights, which offer themselves in a totally unknown country, do not provide many opportunities for boring weekdays. Despite this, sometimes the rainy afternoons of the oceanic climate did not allow me to discover newer and newer places. During this time there were a lot of new acuties who we talked on foreign language and we made good friends. They are contacts from all over Europe now, which is the largest advantage of those months for me.

What was life like all in all? What these five months provided to me and what will be giving in the future? I just could say that I have already known for a long time I will never forge that great semester and the many experiences and joy, which made my personality much richer. I may recommend it to everybody, don't hesitate and be brave to catch the opportunity. Finally, I don't lie if I say that, this half a year foreign experience doesn't mean a disadvantage in the curriculum vitae either.
