

Erasmus report

My name is Mihály Varga, I was in Portugal in Porto in Erasmus. I spent there four unforgettable months. I went there to spend the Erasmus semester at Instituto Superior de Engenharia do Porto with another Hungarian guy.

I expected to study in foreign country in foreign university in a foreign language will be a big adventure as to live the simple days too. The last night before the departure turned out to meet with the local people will come sooner than I thought. Because the school didn't receive the e-mail what says yes we really want accommodation from the school, so we had to start our journey with that fact we don't have place to spend the first nights. After the lucky flight for the first night we found only a hotel room, but for the second we had the final accommodation. In the school we had five classes what we listen in English language and one project work. To listen the lessons with an understanding face wasn't complicated, not as the project where four people needed to find the common English language. Luckily after the school we had more than enough time to discover the city during the day or in the night. The city is full of with antique buildings and with good party places and not least the beach of the ocean has a beautiful view.

I had many new and good experiences during this four month, I can only advise everyone if they have the chance try out this Erasmus experience!
